## EXPERIENCE

Software Engineer Intern

Web

Loop Health

July 2023 – Present

Pune, MH, India

- Worked on development and improvement of internal UI library for ReactJS.
- Wrote Unit test cases using Jest and Storybook.

Full-stack developer

Web and Mobile

Kp Technologies

Dec 2020 – Sep 2021

Remote, India

- Developed an Android application using React Native.
- Developed e-commerce website using NextJS.
- Developed social media website using NextJS.
- Used Firebase in every application and website I developed.

## EDUCATION

Vishwakarma Institute of Information Technology

B.Tech in Computer Engineering

CGPA: 9.81

Aug 2021 – Present

Maharashtra, India

Government Polytechnic, Aurangabad

Diploma in Computer Engineering

96.24%

July 2018 – April 2021

Maharashtra, India

## HONORS & AWARDS

- Chosen to be one of the Mentor for Postman APIFest 2021.
- Chosen as Scaler Elite (in a discord server of 100k+ members) and promoted to Elite+ for technical volunteering.
- Won cash prize for securing 2<sup>nd</sup> rank in HackX 2021 National Hackathon by Scaler.
- Honoured with different goodies for multiple events by companies like Google, AppWrite, DigitalOcean and GitHub, etc.

## SKILLS

HTML

CSS

JavaScript

TypeScript

C++

Python

ReactJS

NextJS

ExpressJS

Jest

Storybook

React Native

Flutter

MongoDB

MySQL

SQLite

PostgreSQL

Git and GitHub

Firebase

MacOS

## PROFILE LINKS

GitHub

LinkedIn

LeetCode

GeeksForGeeks

CodeStudio

Medium

## PROJECTS

Indian Unique Medical Card (IUMC)

- Developed a project with an idea to centralize Indian Medical data and visualize the data.
- First iteration of this project was developed in just 17 hours as a part of national level hackathon and this project won second prize.
- Tech stack: NextJS with TypeScript and Firebase

ScanAttendance Webapp

- Using this website, teachers can take attendance and students can give attendance using QR codes.
- The best thing about this application is that no student can't give fake attendance or give proxy as I have used a dynamic QR code with delays.
- Tech stack: ReactJS, Firebase and Firebase Auth

COVID tracker

- Developed COVID tracker to track COVID cases in all over the world using Disease.sh API
- Tech stack: ReactJS

## OPEN SOURCE

- Contributed to EddieHub's LinkFree repository for basic frontend optimisation.
- Contributed to EddieHub's LinkFree repository to remove bug resulting in client-side errors.
- Contributed to Google Chrome's web.dev repository to improve web development documentation.

## ACHIEVEMENTS

- Secured rank 61 among 1653 participants in one of the GeeksForGeeks Weekly contest
- Secured rank 1 in CodeRoyal coding contest organised by Computer Society of India, VIIT.
- Secured rank 17/600 in GeeksForGeeks Weekly contest 84
- Scored rank 27 in CodeStudio Weekly Contest 32
- Won King Coder award in Scaler discord community.
- Became H2S fellow in 2021.
- Won Clash of Code coding competition organised by Codechef VIIT chapter from our whole college.
- Achieved a Postman Student Expert tag in 2021.
- Secured 2<sup>nd</sup> rank in Google Devfest 2021 Web track.
- Secured 2<sup>nd</sup> rank among 10,718 participants in Scaler HackX 2021 National level hackathon.
- Cracked Infosys at the age of 18.
